PRODUCT FEATURES

Promote the healing of trauma

Have cosmetic effects

Improve the cardiovascular system

Repair gastric mucosal damage

EFFICACY STUDY

Food-grade HA can improve knee osteoarthritis: Oral administration of hyaluronan modulates inflammation by upregulating suppression. The results showed that HA had a significant promoting effect on anti-inflammation of arthritis.

[1] *Oral Hyaluronan Relieves Knee Pain: A Review. Oe et al. Nutrition Journal(2016) 15:11.*

Food-grade HA has cosmetic benefits: A human efficacy test was conducted using hyaluronate moisturizing products as experimental materials. The results showed an increase in the skin moisture of the subjects.

[2] *New Food Resource--Hyaluronic Acid. Song et al. Food and Drug (2009)11:05.*

The results showed that ingested Sodium Hyaluronate could increase skin moisture and improve dry skin.

[3] *Ingested Hyaluronan Moisturizes Dry Skin. Kawada et al. Nutrition Journal (2014) 13:70.*

ABSORPTION MECHANISM

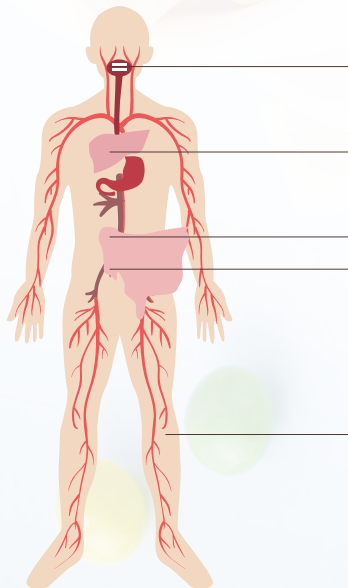

Blood
Test after 15 minutes

Skin
Test after 2 hours
